The disclosure is objected to because of the following informalities: In paragraphs 12 and 26, "fluoroalkyl" is misspelled. In paragraphs 15 and 28, the R variable in the -OR group is not defined. Appropriate correction is required.

Claim 8 is objected to because of the following informalities: "fluoroalkyl" is misspelled. Appropriate correction is required.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The R variable in the -OR group is not defined and therefore claim 2 is indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Chemical abstract citation 140:182355.

This abstract teaches a composition comprising TiO₂ nanotubes dispersed in a PVDF-lithium salt complex polymer electrolyte. This reads upon the claimed composition.

Claims 4-7, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

There is no teaching or suggestion of the claimed subject matter.

The Examiner is in the process of obtaining the above cited article.
